

INTELLIGENCE CAPABILITY DEVELOPMENT

HIGHLIGHTS

- Optimize your ability to consume, analyze and apply threat intelligence within your cyber security operations
- Call on the 12+ years experience building government and commercial intelligence capabilities
- Baseline existing intelligence capabilities and plan improvements
- Determine the cyber risk your organization faces, the intelligence you need to fight that risk and who will use it
- Map out your strategic, operational and tactical use cases for the application of intelligence
- Participate in workshops to improve CTI capabilities and use CTI more effectively in your day-to-day activities

Cyber attackers are often better trained, better funded and better staffed than many security organizations Double Technologies works with. As a result, cyber attacks have become more complex and the resulting damage more severe. It is challenging to find and retain even a single qualified security professional and getting all the professionals you need is often cost prohibitive.

For these reasons, more organizations look to reduce their cyber risk profile and enhance their security posture with cyber threat intelligence (CTI) services. However, many organizations don't know where to start, while others jump in without understanding what threat intelligence they need or how it should be used across their operating environment. The results are generally ineffective and costly. Organizations need to know how to get a better return from their CTI investments.

Double Technology's Intelligence Capability Development services are designed specifically to help organizations realize true value from CTI. Over the last decade, hundreds of organizations have worked with Double Technology's Intelligence Capability Development consultants as trusted advisors to build best practices for the consumption, analysis and practical application of CTI. As a result, they have increased the effectiveness and efficiency of their security programs.

How it works

Intelligence Capability Development has developed a suite of CTI services that use a standardized framework to evaluate the current state of your intelligence capability, blueprint an optimized capability to meet your organizational and regulatory requirements and implement the capabilities required to apply threat intelligence to your use cases. Double Technology's can also manage your capability.

Our framework defines the most critical components of an effective CTI program.

Intelligence Capability Development services address all aspects of the framework and range from limited scoped engagements focused on specific use cases to large-scale program implementations. Double Technology's phased approach ensures we meet you where you are.

Intelligence Capability Assessment

Evaluates the effectiveness of your current threat intelligence capabilities and how well intelligence is integrated into your security program. A detailed gap analysis accompanies a strategic roadmap for addressing those gaps with people, processes and technology recommendations. [Assess]

Intelligence Capability Uplift

Develops the blueprint for how you can implement a world-class threat intelligence program that includes scalable, repeatable processes for the collection, analysis and dissemination of intelligence throughout your organization. [Design]

Operational Intelligence Support

Transform your organization's intelligence capability through dynamic strategic and tactical program consultation. Double Technology's Threat Intelligence subject matter experts implement core intelligence practices and operationalize CTI use cases to meet the day-to-day challenges of your cyber defense teams and executive stakeholders. [Enhance]

Managed Intelligence

Is a minimum one-year complete turnkey intelligence solution. Double Technology's experts solve the challenge of finding talent and sourcing reliable data by combining a Double Technology's Threat Intelligence subscription along with Double Technology's Intelligence Services to meet your needs. Applied Intelligence analysts and capability development consultants deliver the business outcomes you desire. [Operate]
