

Company A [buyer] agrees to the purchase terms of Company B [acquired entity]. Company A's leadership team is ready to begin the integration of both networks quickly, but there is concern regarding potential security gaps between the two organizations that would increase Company A's attack surface and risk vulnerability.

MFC DIO M H FT experts perform the following engagement delivery to meet Company A's cyber security due diligence needs.

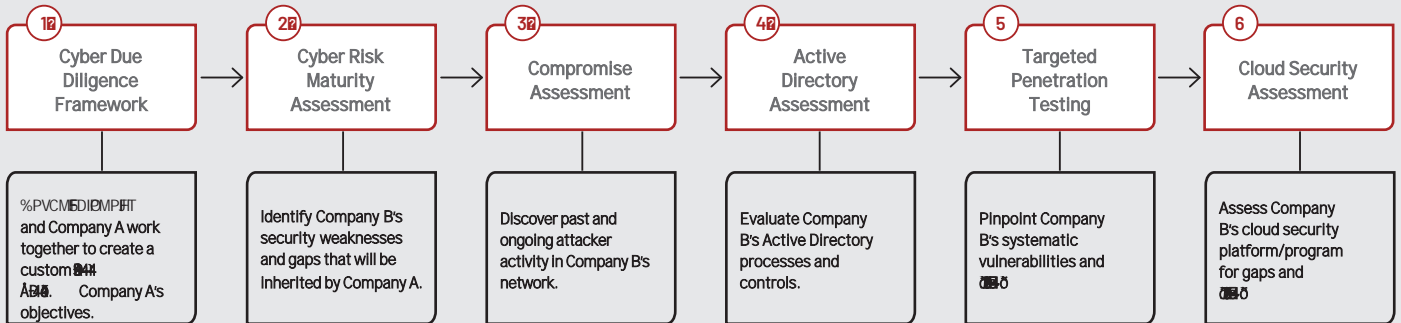

FIGURE 1. Sample engagement scenario. Each engagement performed (services, phases, sequence) is specific to individual client needs.

Last, these purpose-built services are delivered in a phased format—beginning with strategic assessments and leading to technical evaluations, in most cases. MFC DIO M H FT continuously collaborates with the client to maintain a suitable phased delivery of services to meet the client organization's evolving business objectives.

Engagement outcomes

- **Executive briefing.** Visibility into target security maturity levels and recommended integration plan investments
- **Actionable roadmap.** Path to achieve security program improvements and logical integration steps for full business integration
- **Tactical recommendations.** Actions to enable remediation for short- and long-term success of the purchasing organization, selling organization or existing product and service portfolio

WHY MFC DIO M H FT has been at the forefront of cyber security and cyber threat intelligence since 2004. Our incident responders are on the frontlines of the most complex breaches worldwide. We have a deep understanding of both existing and emerging threat actors, as well as their rapidly changing tactics, techniques and procedures.
